GHHS Oath

I pledge by all that I hold dear as a physician:

- I will care for my patients with compassion, respect, empathy, integrity and clinical excellence
- I will listen to my patients with my whole being
- I will advocate for each patient as a unique individual
- I will serve as a role model and mentor to promote humanism in health care
- I will remember always the healing power of acts of caring
- I will dedicate myself to joining with others to make health care optimal for all.

Medical Student Oath

University of South Alabama College of Medicine

In order to contribute to a spirit of moral and intellectual development; affirming that honor, integrity, and compassion are my highest ideals; and endeavoring to create a community of sensitivity and commitment, I pledge to my future patients, my colleagues, and my mentors the following:

That in all instances I shall maintain a state of sensitivity and compassion; realizing always that my greatest commitment is to my patients. I will henceforth preserve the confidentiality of my patients and I will render to them the highest possible standard of care. In short, I will conduct myself with unquestionable integrity in all of my professional relations.

Realizing the power of cooperation, and the common bond between practitioners of the healing arts, I will respect the contributions of my brothers and sisters in medicine, pharmacy, nursing, and in the health related professions. I will in no way breach this bond of respect, and I will strive to realize our collective commitment to heal and comfort the poor of body and spirit.

I will honor the rich tradition embodied in learning the art and the science of medicine. I will always seek to learn from the knowledge, wisdom, and experience of my mentors. May I never forget that medical education is a privilege bestowed on me by those who have entrusted their well-being and the well-being of others to me. Further, let me never forget that it is my responsibility to learn the science and the art of medicine; and that my learning within the noble profession of medicine is a life-long process. May I be worthy of this trust and may I always remember that henceforth I must put others before myself.

I affirm before my future colleagues in medicine that I will be true to this pledge.
